

Data Analyst

Job Description

Data analyst to empower Association of Community Services (ACS) to use data to advance its mission of strengthening the nonprofit community to improve the quality of life in Howard County. The analyst will discover, harmonize, analyze, and present data that provides practitioners, policymakers, and the public with accurate and timely information that is relevant to policy in the County.

This position is a 10-hour per week, 6-month position that is grant funded.

Organizational Background

ACS is a network of 168 member organizations and community advocates from a variety of fields including health and human services, housing, the environment, education and training, and the arts. Its mission is to improve the quality of life in Howard County by making the nonprofit community stronger. Founded in 1963, ACS works to convene and connect community leaders; increase the impact and collective voice of member organizations; and empower nonprofits to more effectively deliver services through education and mentoring.

Position Requirements

- Technical training in a data-related field, preferably in the social sciences
- Ability to communicate results accurately, including their limitations, to a non-technical audience in written and graphic form.
- Ability to collaborate effectively and work as part of a team
- Excellent written and oral communication

Interested applicants should submit a letter of interest and resume to joan.driessen@acshoco.org by September 12, 2019.
